

CAREERS SEARCH

Students will set up logins and be given time to use their Start Profile in Life Skills which will allow students to set up personal profiles by rating their interests, skills etc. They will then be able to explore many different careers and see how well they match to their personal profiles. Once they have their logins and are shown how to use the site, students will be able to access this information anywhere that they can get online. Students should use these regularly to help them to decide on a career path.

Students will set up a login for Start in Year 9.

Log in to your Start Profile account to explore different careers.
